

CMIP6 model performance ranking across Jordan's 12 hydrological basins (1995–2014)

Basins (ordered by decreasing annual precipitation)

Cell colour = per-metric rank of each model within that basin (1 = best-performing; 6 = worst-performing)

- S = Best Single Model recommended
- E3 = 3-Model Ensemble recommended
- E6 = 6-Model Ensemble recommended
- Bold border = best-overall model for that basin (lowest average composite rank across all metrics)
